

# Why use **Pole Life** products instead of replacing a damaged pole? Good Question!

- Maybe it's a newer pole that was recently installed, now the top is damaged by woodpeckers or storms.
- Spend \$400 M&L instead of \$4,000 M&L average.
- Save on wasting another tree & disposal cost of the pole.
- Save on trucking cost to bring pole and material to job site.
- Save on joint use transfers and stub pole removals.
- Solve the problem while the bucket is there the 1<sup>st</sup> time.
- Pole Life products are permanent and will be there for the rest of the pole's usable life span doing their job.
- **Safety, time and money \$\$\$.**

Pole Top restoration made fast and simple!  
All types of OH construction.

A safer more reliable system!
